

**4SHP13LE**

13 SEER,  
Single-Stage  
Heat Pumps

PROVEN TECHNOLOGY AND VALUE ARE ALWAYS A SMART CHOICE.

# THE PROFESSIONAL'S CHOICE

**ARMSTRONG**  
**AIR**<sup>®</sup>  
The Professional's Choice

Industry professionals know Armstrong Air™ is the smart choice for advanced heating and cooling technology.

The **4SHPI3LE** represents Armstrong Air's **commitment to serious performance and value.** It's designed by comfort experts, and built by people who take genuine pride in their work. So naturally, the professionals who know air conditioning continue to recommend the 4SHPI3LE to their **customers who want more** from a heat pump.

## Inside the design of an Armstrong Air 4SHP13LE Heat Pump:

### MHT™ Technology:

Armstrong Air's proprietary heat transfer system. A specially designed fan shroud pulls air evenly throughout the heat pump's coil surface. The coil features rifled tubing to enhance refrigerant flow, while lanced coil fins increase surface contact between metal and air. All combine for maximum heat transfer and efficiency.

### QuietShift™ Technology:

Allows heat pumps to enter defrost mode without excessive noise. Since refrigerant pressure is allowed to equalize before the switch, the heat pump can dissipate performance-robbing frost and ice quietly.

### Sound Reduction:

Inside every 4SHP13LE, you'll find a compressor that's wrapped in a heavy-duty, sound-insulating blanket to reduce operating noise. So you'll enjoy peace and quiet with your comfort.

### Advanced Compressor Protection:

High- and low-pressure switches give additional reliability to each Armstrong Air heat pump. The high-pressure switch prevents operation if refrigerant pressures exceed safe levels, protecting the compressor. If your unit does not have enough refrigerant, the low-pressure switch prevents the unit from drawing in moisture and other contaminants while operating.

### Microban® Protection:

On Matched Armstrong Air Indoor Coil. Drain pans are infused with an antibacterial agent that destabilizes the membrane of microorganism cells, disrupting the cellular function of odor-causing mold and bacteria so they can no longer grow or reproduce.

## Dual-Fuel

The combination of a gas furnace and an electric heat pump pairs two energy sources for the perfect balance of energy efficiency and comfort.

## The advanced features of the Armstrong Air 4SHP13LE work together to bring you:

### CRAFTSMANSHIP

The 4SHP13LE is full of smart thinking throughout. Like MHT Technology, a new fin design that improves surface contact for **greater heat transfer**. Additional touches like an insulation blanket for **quieter operation** and a Microban®-treated drain pan on the indoor coil demonstrate Armstrong Air's commitment to offering more in every respect.

### EFFICIENCY

The 4SHP13LE offers a Seasonal Energy Efficiency Ratio (SEER) of 13.00 and a Heating Season Performance Factor (HSPF) of 8.00, which means your new system can help you **use less energy every month** in any weather, even when compared to a system that's only a few years old.

### COMMITMENT

Armstrong Air's dedication to a better product is backed by a 10-Year Limited Warranty on the compressor and a 10-Year Limited Warranty on parts.\*

From advanced technology to reliability, Armstrong Air™ delivers more with the 4SHP13LE.

**PRECISE PERFORMANCE**

Inside every 4SHP13LE you'll find advancements like MHT™ Technology, which improves efficiency and comfort through greater heat transfer. You'll also find high- and low-pressure switches that constantly optimize performance and help protect against faults, a sound-insulating blanket to keep your environment quiet and peaceful, and QuietShift™ Technology that allows your 4SHP13LE to defrost quietly.

Pairing your 4SHP13LE with an Armstrong Air gas furnace creates a dual-fuel system. Since it can use either gas or electricity to keep you comfortable, a dual-fuel system can help you use whichever is most efficient for the weather outside.

**EFFICIENCY**

When comparing heat pumps, the Seasonal Energy Efficiency Ratio (SEER) and Heating Season Performance Factor (HSPF) can tell you how much energy your unit will use through heating and cooling seasons. The 4SHP13LE's SEER of 13.00 and HSPF of 8.00 mean it will deliver efficiency that meets or exceeds the standards created by the government. So you'll always use energy wisely.

**5-YEAR ENERGY SAVINGS\*\***

Savings versus 10.00 SEER units

\*Warranty applies to residential applications only. See full warranty at [www.alliedair.com](http://www.alliedair.com) for terms, conditions and exclusions.

\*\*Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors.

The Armstrong Air 4SHP13LE is a smart investment. And the choice of those who know heat pumps inside and out.

When you select the 4SHP13LE, you're choosing a better way to stay comfortable in any weather. You're choosing a heat pump that draws on 80 years of expertise and one that's built by people who take pride in their work. Enjoy the technologically advanced comfort that Armstrong Air offers.

**It's a smart choice, and it's THE PROFESSIONAL'S CHOICE.**
